TECHNICAL SKILLS

Languages/Frameworks - JavaScript, ES6, React (Hooks), Node.js, Express, Redux, Sass, jQuery, HTML, CSS

Databases - SQL, MySQL, MongoDB, Mongoose, PostgreSQL

Testing - Jest, Chai, Mocha, Artillery

Other - Git, GitHub, NPM, Webpack, Heroku, RESTful APIs

SOFTWARE APPLICATIONS

Catwalk - Front End Software Engineer

Retail Web Portal - React/ Redux/ Sass/ Webpack

- Created custom dynamic product details component built to fit unique client requirements
- Applied React with hooks and React-Router to serve up a dynamic single page application
- Implemented React with Redux to manage state effectively, centralize API calls, and manage information flow with multiple components
- Utilized SASS to create consistent and maintainable theme across application
- Collaborated with a team of two engineers, utilizing agile methodology, to work towards meeting business requirements

Namaslay - Front End Software Engineer

Yoga and Meditation Social App - React/ React-Router/ React-Bootstrap/ Express/ PostgreSQL

- Created frontend components of the app to meet client expectations, rapidly iterating from MVP to a fully deployed service
- Worked in a team of eight following agile practices and git workflow
- Created custom event planner using React Big Calendar
- Performed a role of a UI owner and created wireframes for communications with the client

Leashed - Full Stack Engineer

Dog breed finder - React/ Node.js/ Express.js/ Heroku

- Created unique UI and utilized parallax scrolling to give the web app its modern look
- Used React to create the single page app with search functionality
- Integrated with TheDogAPI to retrieve information about various breeds

Overview module - Software Engineer

An npm module which presents a reusable React component for building gallery and photo carousel

- Created and published an npm module that renders photo gallery and product information using data from the external API
- Built custom image carousel component with CSS and JS, supporting click-to-scroll functionality

PROFESSIONAL EXPERIENCE

Software Engineering Immersive Resident

Galvanize | 2020 - 2021

- Provided technical mentorship to 100+ students, and guided them through mastering technologies such as JavaScript, React, Express.js, MySQL, and MongoDB;
- Collaborated with management to develop and improve an existing curriculum to enhance student experience.
- Conducted whiteboarding sessions, technical mock interviews, code reviews

Fashion Advisor

Dolce&Gabbana | 2019 - 2020

- Provided styling support to vip clients;
- Worked on constant expansion of the client book;
- Maintained relationship with existing clients

Product Specialist

Massimo Dutti | 2018 - 2019

- Trained new hires and present employees on product and sales code;
- Partnered with operations and visual teams to coordinate shipments;
- Analyzed reports and collected product feedback.

Project Manager

Bosch | 2017 - 2018

- Coordination of call center and on-line service operations (hotline, outbound team);
- Organized work process, call sessions, training and learning cycles;
- Regular project activity in close cooperation with all business units.

EDUCATION

Hack Reactor

Software Engineering Immersive | 2020

Volgograd State University

BA in Linguistics | 2010
